

CONSTRUCTION NOTIFICATION

Coastal GasLink is committed to creating an extraordinary legacy of safety and respect for all people, communities and the environment. As part of this commitment, we are keeping our neighbours along the project route informed on construction. Please note the following information:

What: Controlled blasting activities will begin in Sections 1 and 2 along the project route, roads and ancillary sites. All blasting activities will be done in accordance with provincial and federal regulations.

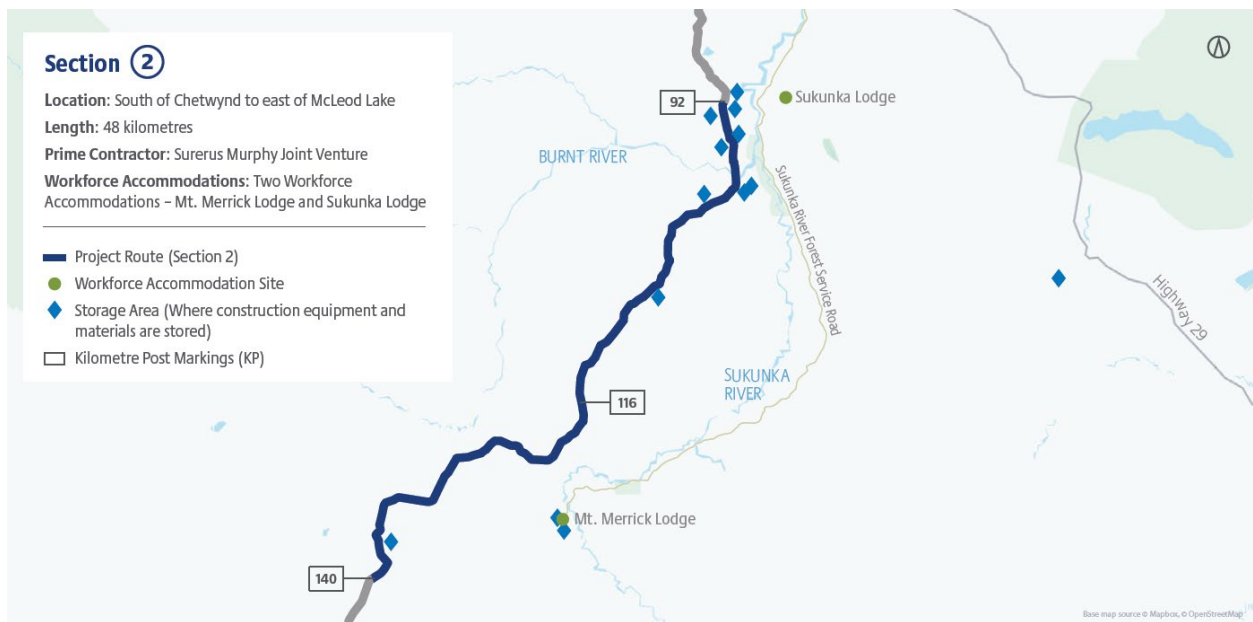

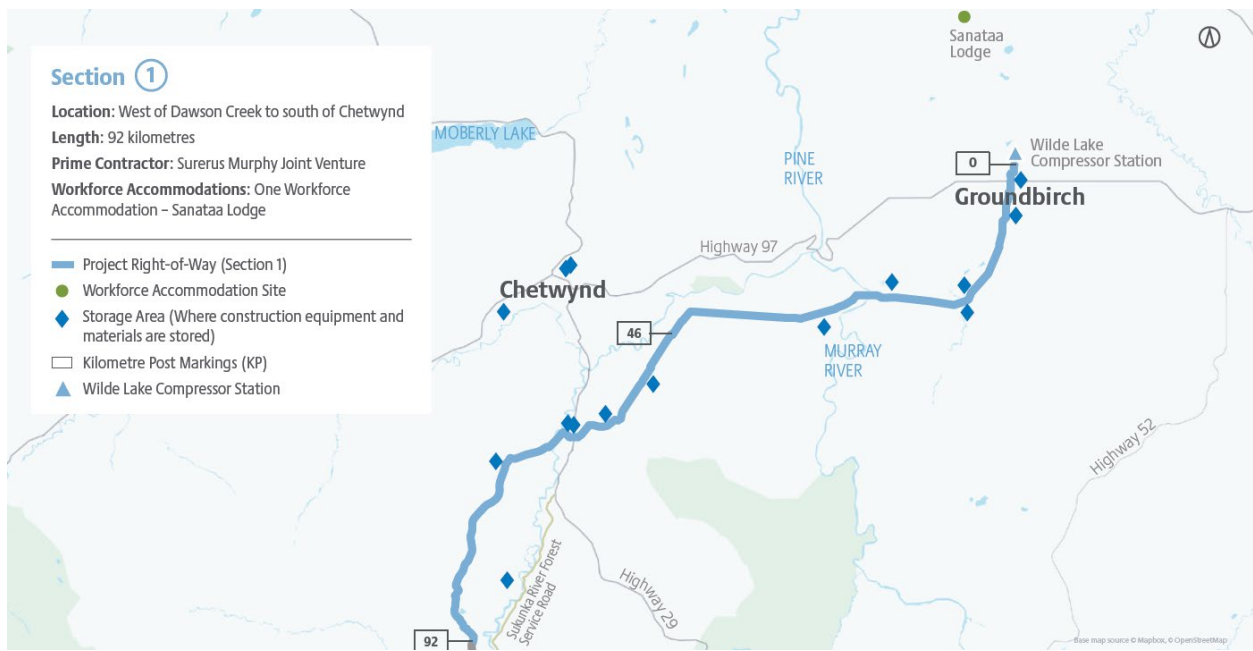

When: Beginning early January 2022, blasting will be conducted daily between 8 a.m. and 6 p.m. and will continue until the end of April 2022 in some areas.

Where: Blasting activities will occur between KP 15 to 16 and KP 98 to 113 along the project route.

Expected Duration: From early January 2022 through to the end of April 2022. Depending on the location, blasting activities in any particular location may occur for one or more days during this timeframe.

Potential Impact: While there are no anticipated permanent road closures required as part of this activity, public access to this segment of the project route and a surrounding safety zone will be restricted during this period. There are no permanent residences located within 300 metres of the area. The project route intersects with Highway 97 and Highway 29, but no impacts to normal operation have been identified at this time. However, some restrictions to local and forestry roads may be required during blasting depending on the scope and location of work. It is not expected that these activities will result in any detectable sound or vibration beyond the immediate work area.

Map: Please see map(s) below.

Questions regarding these activities or general project construction can be directed via email to coastalgaslink@tcenergy.com or by phone to 1-855-633-2011.
