

Water Crossing Notification

Parsnip River

Coastal GasLink is committed to creating an extraordinary legacy of safety and respect for all people, communities and the environment. As part of this commitment we are keeping our neighbors along the project route informed on construction activities happening near their community. Please note the following information:

What: Direct Pipe Installation (DPI) construction activities will be taking place at the Parsnip River along the pipeline construction corridor.

Direct Pipe Method: DPI is a hybrid of horizontal directional drilling and micro-tunnelling (a pipe jack operation that utilizes a micro-tunnelling bore machine). This method will minimize disruption to instream activities, the surrounding environment, fish habitat and the riverbank. To learn more about how we take care of our rivers and streams, please visit coastalgaslink.com.

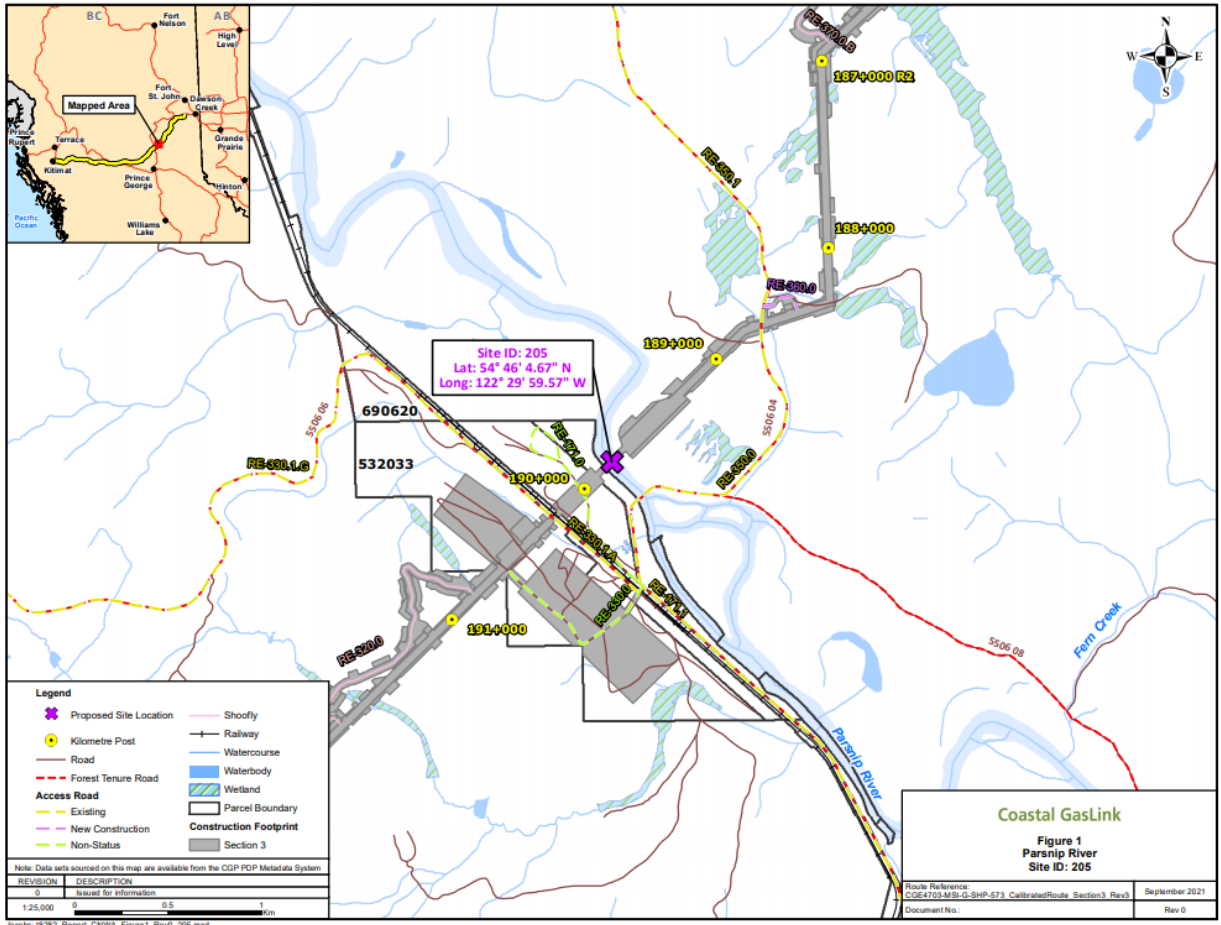

When: Beginning on November 29, 2021 construction activities will take place 24 hours per day and continue until December 20, 2021.

Where: Construction activities will occur at KP 189+300 to KP 189+900 along the project route. The nearest community of Bear Lake is located approximately 40 kilometres southwest of this activity.

Expected Duration: Drilling will occur November 29, 2021 through to December 20, 2021**Note – there will be set up activities occurring in the area for the month of November and clean-up activities continuing into January.

Potential Impact: Public access to this segment of the Parsnip River via watercraft is **not restricted** at this time and only the DPI entry and exit pads will be restricted during this period. There are no residences located within this area. It is not expected that these activities will result in any detectable sound or vibration beyond the immediate work area.

Map: Please see the following page.

Questions regarding these activities or general project construction can be directed via email to coastalgaslink@tcenergy.com or by phone to 1-855-633-2011
