

SEEMP Status Report No. 2-3

June to November 2025

M000987-CGP-SO-RPRT-0004

Issued for Use

Revision 00

December 15, 2025

EXECUTIVE SUMMARY

On October 23, 2014, the British Columbia Environmental Assessment Office (BC EAO) issued an Environmental Assessment Certificate (EAC) for the Coastal GasLink Pipeline Project (the Project). The EAC was conditionally issued following the BC EAO's assessment of environmental, social, economic, heritage and health components deemed relevant to the Project.

The Project's EAC includes 33 conditions to address potential adverse effects, based on input from Indigenous groups, local communities and resource management agencies during the Environmental Assessment process. Condition #24 describes the requirement to develop a Socio-economic Effects Management Plan (SEEMP).

The SEEMP identifies the Project's approach to implementing mitigation measures during construction to avoid or reduce potential adverse socio-economic effects on regional and community infrastructure and services. These potential effects were presented in the Application for an EAC (the Application). The SEEMP also outlines a process for how the effectiveness of mitigation will be monitored and reported. The Project will use an Adaptive Management Process (outlined in Section 6.3 of the SEEMP) during situations where monitoring indicates unpredicted outcomes. Coastal GasLink has committed to preparing and filing semi-annual reports on SEEMP activities for the duration of construction activities.

As contemplated in Coastal GasLink's approved EAC, the Coastal GasLink Project can increase its capacity from an initial 2.1 bcf/d to as much as 5 bcf/d with the addition of compression facilities, including the Mount Bracey Compressor Station. Construction of this new facility commenced in July 2024. The Mount Bracey Compressor Station is located along the Coastal GasLink pipeline about 60 km east of the community of McLeod Lake and 198 km northeast of Prince George. This compressor station will power the transportation of incremental additional natural gas to Cedar LNG, a floating liquefied natural gas (LNG) facility in Kitimat, B.C. Cedar LNG brings together Haisla Nation and Pembina Pipeline Corporation to develop the Haisla Nation-led project. Cedar LNG announced a positive Final Investment Decision on June 25, 2024.

During the third SEEMP reporting period for the expansion projects and final reclamation work, June to November 2025 (the reporting period), Coastal GasLink continued to monitor and collaborate with potentially affected communities regarding various socio-economic components including emergency services, contracting, employment, education and training, health care services, housing, transportation and waste management. There were no observed effects attributable to Coastal GasLink on regional and community infrastructure and services that would change the predictions of the socio-economic assessment presented in the Application.

1.0 INTRODUCTION

Coastal GasLink’s Socio-economic Effects Management Plan (SEEMP) describes the plan for implementing mitigation to reduce potential adverse socio-economic effects during the Project’s construction phase. The SEEMP also describes the approach to monitoring and reporting mitigation effectiveness on community-level infrastructure and services.

As outlined in Section 7 of the SEEMP, Coastal GasLink submits semi-annual SEEMP status reports directly to the BC EAO, the Ministry of Housing and Municipal Affairs and SEEMP contacts. A final construction monitoring report will be submitted within two years after project construction is completed. SEEMP status reports are made publicly available on the Project’s website at CoastalGasLink.com.

Compression facility construction, including the Mount Bracey Compressor Station, is contemplated within Coastal GasLink’s EAC. The Mount Bracey Compressor Station will power the transportation of an additional 0.4 bcf/d of natural gas to Cedar LNG.

This is the third SEEMP status report related to construction of Coastal GasLink’s additional compression facilities, specifically Mount Bracey. It describes SEEMP implementation from June through November 2025, and includes supplemental data and activities related to Phase 1 summer reclamation work that took place at the former site of Huckleberry Lodge. Table 1-1 provides a summary of the Project’s SEEMP status reports.

Table 1-1: SEEMP Status Reports and Reporting Periods

SEEMP Status Report No.	Reporting Period	Date of Issuance
Base Project: Pipeline and associated facilities including Wilde Lake Compressor Station and Kitimat Meter Station		
1	December 2018 – June 2019	July 2019
2	July – November 2019	December 2019

2-2	December 2024 – May 2025	June 2025
2-3	June – November 2025	December 2025

2.0 PROJECT OVERVIEW

Coastal GasLink is a 670-km pipeline designed to transport natural gas from the Montney gas producing region, starting near Dawson Creek, B.C. and extending to the LNG Canada facility in Kitimat, B.C. (see Figure 2-1). The pipeline will have an initial capacity of approximately 2.1 bcf/d, with the potential to increase transportation capacity to allow delivery of up to approximately 5 bcf/d.

On October 2, 2018, TransCanada Corporation, now TC Energy Corporation (TC Energy), announced that it would proceed with construction of Coastal GasLink after a decision to sanction the LNG Canada liquefied natural gas facility in Kitimat was announced by the joint venture participants of LNG Canada. Construction activities began on Coastal GasLink in December 2018.

With mechanical completion of the base project in November 2023 (including the pipeline, Wilde Lake Compressor Station and Kitimat Meter Station), Coastal GasLink continues to focus on safe and reliable operations of the pipeline system. The final post-construction activities for the base project were completed in summer 2025 with the reclamation activities at the Huckleberry Lodge site completed by field crews in August. Planned work along the project route is typical of an operating asset.

As contemplated in Coastal GasLink's approved EAC, the Coastal GasLink pipeline can transport up to 5 bcf/d with the addition of compression facilities, including the Mount Bracey Compressor Station. This new facility is located approximately 198 km northeast of Prince George. It will power the transportation of an additional 0.4 bcf/d of natural gas to Cedar LNG. Natural gas will be received from Coastal GasLink for delivery to Cedar LNG, a floating liquified natural gas (LNG) facility in Kitimat, B.C. The Cedar LNG Project brings together Haisla Nation and Pembina Pipeline Corporation to develop the Haisla Nation-led project. The Mount Bracey Compressor Station will be developed, constructed and operated by Coastal GasLink Pipeline Ltd., a TC Energy subsidiary.

The second construction season of the Mount Bracey Compressor Station continued through this reporting period. In addition, crews completed site reclamation work at the former site of Huckleberry Lodge during summer 2025.

Figure 2-1: Coastal GasLink Pipeline Corridor Map, 2025

2.1. PROJECT CONSTRUCTION UPDATE

2.1.1. Mount Bracey Compressor Station

Construction at the Mount Bracey Compressor Station resumed in early May with a gradual increase of field-based crews. Crews have been installing structural supports for piping and electrical components, setting pre-manufactured auxiliary buildings, welding pipe and receiving and installing the facility's natural gas coolers. Erecting the three compressor buildings is underway in preparation for the arrival of the Project's turbo compressor units later in the year and early in 2026.

The Mount Bracey Lodge occupancy fluctuated between 141 and 360 during this reporting period.

The Prime Contractor for the Mount Bracey Compressor Station construction is Strike Group. The contractor for Mount Bracey Lodge is Horizon North.

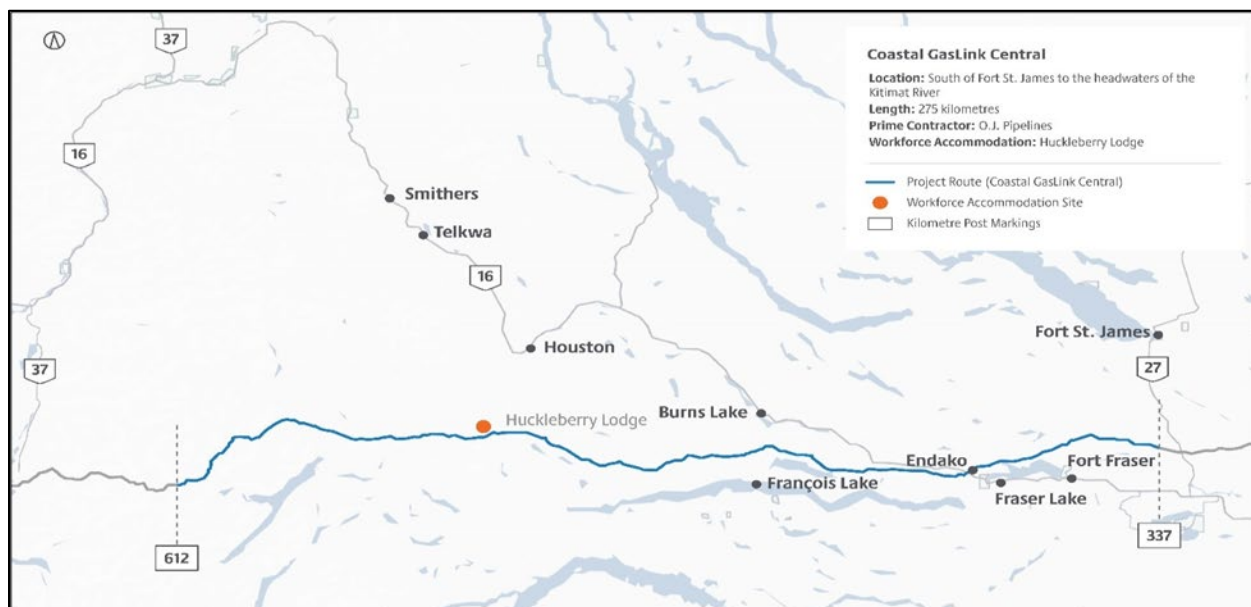

Figure 2-2: Coastal GasLink Central

2.1.2. Huckleberry Lodge Reclamation

In August 2025, reclamation activities at the Huckleberry Lodge site (see Figure 2-2) were successfully completed by field crews. Originally established to support workforce accommodation for project personnel, the site served its operational purpose until the final meal was served in September 2024 signaling the beginning of the site's transition from active use to environmental restoration.

As part of the decommissioning process, associated access roads were retired in accordance with the conditions outlined in the applicable permits. Throughout the reclamation process, erosion and sediment control measures were maintained to ensure environmental protection and compliance with regulatory standards. These controls helped prevent soil degradation and safeguarded nearby water bodies from sediment runoff, reflecting a strong commitment to sustainable land management practices.

The completion of the reclamation at the Huckleberry Lodge site not only restores the land to its natural state but also demonstrates the Project team's commitment to responsible land use, regulatory compliance and environmental stewardship.

The field-based workforce completing reclamation activities peaked at 53. O.J. Pipelines has completed the work while providing opportunities to:

- Carbon Medical (Yinka Dene economic Development LP, Wet'suwet'en First Nation))
- Environmental 360 Solutions (Kyah Development Corporation, Witset First Nation)
- Backcountry Wildlife Monitoring (Wet'suwet'en First Nation, Haisla First Nation)

3.0 ENGAGEMENT

Coastal GasLink continued to engage with those affected by the Project as described in Section 3.2 of the SEEMP. In this report, which is focused on Mount Bracey Compressor Station construction as well as summer reclamation activities at the former site of Huckleberry Lodge, Coastal GasLink engaged with a reduced list of contacts potentially impacted by construction as outlined in Table 3-1 below.

During SEEMP engagement, SEEMP contacts discussed contracting and employment, education and training, emergency services, emergency management planning, health care services, waste management, traffic and transportation.

3.1. PROJECT ENGAGEMENT

Coastal GasLink continued engagement with Indigenous groups regarding project-related activities, commitments and topics of interest. During the reporting period, Coastal GasLink attended 15 meetings with Indigenous groups about the Mount Bracey Compressor Station and one meeting about the Huckleberry Lodge site reclamation. In addition to project-related engagement and consultation, representatives from Coastal GasLink participated in the following activities with Indigenous communities:

- 13 community and cultural events hosted by Indigenous communities
- 8 liaison committee meetings
- 1 community meeting
- 1 meeting to discuss education, training and community investments
- 1 site visit / flyover

During meetings with Indigenous community representatives, topics discussed include project updates, project consultation, education and training program updates, employment opportunities, contracting and procurement, waste management and community investments.

Coastal GasLink presented to municipal council and regional district board meetings on 11 occasions during the reporting period, bringing the total to 122 presentations since October 2018. Coastal GasLink held an additional 26 engagement meetings with local governments and chambers of commerce separate from SEEMP engagement meetings during the reporting period.

In addition to engagement activities, Coastal GasLink continued to share project information through its website, CoastalGasLink.com. In August 2025, Coastal GasLink shared a Cedar Link Project construction update, including information about the status of the Mount Bracey Compressor Station construction as well as Coastal GasLink post-construction activities.

SEEMP implementation information presented in this status report considers feedback from SEEMP engagement. During this reporting period, Coastal GasLink invited 36 SEEMP contacts to engage on SEEMP implementation. Meetings took place with 13 SEEMP contacts including 6 Indigenous groups, 2 local governments and 5 provincial agencies.

3.1.1. Contacts

SEEMP implementation engagement contacts include 13 Indigenous groups, 5 local governments and 18 provincial agencies as shown in Table 3-1. This list applies to contacts engaged specifically regarding the Mount Bracey Compressor Station and summer reclamation activities at the former site of Huckleberry Lodge.

Table 3-1: SEEMP Contacts

Indigenous Groups	Local Governments	Provincial Agencies
Blueberry River First Nations Doig River First Nation Halfway River First Nation Saulteau First Nations West Moberly First Nations McLeod Lake Indian Band Dark House Nee Tahi Buhn Office of the Wet'suwet'en Stellat'en Nation Skin Tyee First Nation Wet'suwet'en First Nation Witset First Nation	City of Prince George District of Mackenzie Regional District of Fraser-Fort George District of Houston Regional District of Bulkley-Nechako	BC Emergency Health Services BC Energy Regulator BC Environmental Assessment Office BC Clean Energy and Major Projects Office Ministry of Children and Family Development Ministry of Education and Child Care – Capital Management Branch Ministry of Emergency Management and Climate Readiness Ministry of Forests – Regional Economic Operations Branch Ministry of Health – Health Protection Integration and Engagement Ministry of Indigenous Relations and Reconciliation Ministry of Jobs, Economic Development and Innovation Ministry of Housing & Municipal Affairs Ministry of Post-secondary Education and Future Skills Ministry of Public Safety and Solicitor General – Victim Services and Crime Prevention Branch Ministry of Public Safety and Solicitor General – Policing & Security Branch Ministry of Social Development and Poverty Reduction Ministry of Transportation and Transit Northern Health Authority
<p>Note: Contacts identified in bold font participated in engagement during this cycle.</p>		

4.0 POTENTIAL ADVERSE EFFECTS

Potential adverse effects were assessed in the Project’s Application. Baseline information was presented in the Application’s Appendix 2M: Social Technical Report and Appendix 2N: Economic Technical Report. See Appendix A for a summary of the potential adverse socio-economic effects and status of mitigation measures identified in the Application.

The following sections describe mitigation activities carried out by Coastal GasLink during the reporting period.

4.1. ECONOMY: CONTRACTS AND PROCUREMENT EXPENDITURES

In the Application, the following potential adverse effect was identified in relation to contracts and procurement expenditures:

- limited participation in contract opportunities

4.1.1. Activities

- Coastal GasLink continued to maintain a database of businesses interested in participating in procurement opportunities.
- Coastal GasLink continued to work with Indigenous groups that have contracts associated with the Project to accurately understand the financial benefit that they receive from contract awards.
- Further to the identified potential adverse effect on an Indigenous or local business’s ability to participate in the subcontracting process, Table 4-1 shows the available data on Indigenous and local contract award values to November 2025. The Indigenous category includes contract awards made to local Indigenous and local non-Indigenous businesses that are working together on Mount Bracey Compressor Station and the Huckleberry Lodge site reclamation.

Table 4-1: Indigenous and Local Subcontract Award Values to November 2025

Project Component	Business Type	Subcontract Award Value	Percentage of Total Subcontract Award Value ¹
Mount Bracey Compressor Station	Local (B.C.)	\$102.4 million	73.9%
	Indigenous ^{2,3}	\$98.0 million	70.0%
Huckleberry Lodge Site Reclamation	Local (B.C.)	\$361,147	100%
	Indigenous ^{2,3}	\$230,447	63.8%
Notes:			
¹ The percentage calculation is based on the total value of subcontracts (\$138.5 million and \$361,147) available and awarded by Coastal GasLink and Prime Contractors to Indigenous and B.C. businesses conducting work on the Mount Bracey Compressor Station and Huckleberry Lodge site reclamation respectively.			

Project Component	Business Type	Subcontract Award Value	Percentage of Total Subcontract Award Value ¹
<p>² The Indigenous category is a subset of the Local (B.C.) category; therefore, it is important not to double-count award values between these two categories.</p> <p>³ The Indigenous category includes contract awards made to local Indigenous businesses and those where local Indigenous businesses and local non-Indigenous businesses have partnered for Coastal GasLink activities. Coastal GasLink acknowledges that the total dollar value of these contracts at award may not be the same as the total dollar value received as benefits by the Indigenous partner.</p>			

4.1.2. Mitigation Effectiveness in the Reporting Period

Local contracting opportunities were made available during the reporting period. The total value of contracts awarded to local (B.C.) businesses by Coastal GasLink and its Prime Contractors for the construction phase of Mount Bracey Compressor Station and Huckleberry Lodge site reclamation is approximately \$102.4 million and \$361,147 respectively (see Table 4-1).

4.2. ECONOMY: COMMUNITY ECONOMIC RESILIENCE

In the Application, the following potential adverse effect was identified in relation to community economic resilience:

- alteration of existing community economic patterns

4.2.1. Activities

- Coastal GasLink provided project information to local governments and key stakeholders in a timely manner.
- Coastal GasLink maintained memberships with 12 Northern B.C. chambers of commerce in communities along the Coastal GasLink corridor.
- In June 2025, Coastal GasLink attended the Grand Opening for the Tourism Prince George’s Nanguz’An Container Market. Coastal GasLink and TC Energy’s contribution to the market was acknowledged on the market signage alongside other sponsors and community groups.
- In June 2025, Coastal GasLink sponsored the North East Native Advancing Society’s Connect! First Nations and Industry Forum.
- In June 2025, Coastal GasLink sponsored and participated in the B.C. Chamber of Commerce AGM and Conference in Nanaimo, B.C.
- In August 2025, Coastal GasLink sponsored and attended the Prince George Chamber of Commerce Leadership Series breakfast with one of the local Members of Parliament as guest speaker.

- In October 2025, Coastal GasLink sponsored and attended the Prince George Chamber of Commerce Leadership Series breakfast with the CEO of the Prince George Airport Authority as guest speaker.
- In October 2025, Coastal GasLink confirmed a bronze-level sponsorship of the B.C. Construction Association's Construction Month that will take place in April 2026.
- In November 2025, Coastal GasLink sponsored and attended the Prince George Chamber of Commerce 40th Annual Business Excellence Awards in celebration and support of local businesses.
- In November 2025, Coastal GasLink sponsored and attended the Prince George Chamber of Commerce Leadership Series breakfast with Mayor Simon Yu of Prince George as guest speaker.

4.2.2. Mitigation Effectiveness in the Reporting Period

During the reporting period, Coastal GasLink continued to participate in local business development events to collaborate and share regional economic development opportunity information with Indigenous groups, local communities and chambers of commerce located near the Project. Community feedback about the effects from the Project's construction on the local economy remained positive. Coastal GasLink continues to work with Indigenous groups and local governments to monitor community-specific economic effects to local businesses throughout the Project's construction.

As presented in the Application and through monitoring, there are no anticipated long-term or permanent adverse effects on community economic resilience that cannot be mitigated.

4.3. EMPLOYMENT AND LABOUR FORCE: EMPLOYMENT

In the Application, the following potential adverse effect was identified in relation to employment:

- skilled labour shortage

4.3.1. Activities

- During the reporting period, the field-based workforce at the Mount Bracey Compressor Station fluctuated between 141 and 360.
- During the reporting period, the field-based workforce for Phase 1 summer reclamation activities peaked at 53.
- In October 2025, Coastal GasLink attended a Job Fair hosted by Saulteau First Nations.

4.3.2. Mitigation Effectiveness in the Reporting Period

During the reporting period, Coastal GasLink participated in local business development events to collaborate and share regional economic development opportunity information with Indigenous groups, local communities and chambers of commerce (see Sections 4.2.1 and 4.3.1).

As presented in the Application and through monitoring, there continues to be no anticipated long-term or permanent adverse effects on skilled labour shortage that cannot be mitigated.

4.4. EMPLOYMENT AND LABOUR FORCE: TRAINING OPPORTUNITIES

In the Application, a potential adverse effect was identified in relation to training opportunities:

- lack of time to train local workers for skilled positions

4.4.1. Activities

- Coastal GasLink communicated with local education and training service providers regarding anticipated construction schedules, workforce skill requirements, and expected demand for education services.
- Coastal GasLink engaged with Indigenous Skills and Employment Training (ISET) groups, training institutions and colleges, to provide education and training opportunities in accordance with community priorities and the needs of the Project.
- Coastal GasLink continued long-term partnerships with post-secondary institutions in Northern B.C. to support the regional labour force and development of transferable skills. Partners include the University of Northern British Columbia (UNBC), Coast Mountain College (CMTN), College of New Caledonia (CNC) and Northern Lights College (NLC). Since 2014, Coastal GasLink has invested over \$1.78 million through post-secondary partnership agreements and almost \$1.71 million in skills training and pre-employment programs delivered by Indigenous, non-profit and for-profit training organizations in Northern B.C. During the same period, TC Energy has contributed approximately \$1.15 million to support Coastal GasLink education and training initiatives in the project area.
- Student bursaries were made available to Indigenous and local individuals directly through UNBC, CMTN, CNC and NLC. Since 2014, Coastal GasLink funding has provided 784 scholarships and bursaries through post-secondary institutions in Northern B.C., with 370 awarded to students identifying as Indigenous. In 2024, Coastal GasLink entered into a multi-year agreement with CNC. Over a three-year period, the Coastal GasLink Community Strength Fund will provide 10 bursaries per year for students in financial need or students who need academic upgrading before they begin full-time study. The agreement also sets up an ongoing annual bursary for a student enrolled in a social services or community support worker program.

- During July 2025, Coastal GasLink supported 12 Indigenous students to enroll in Northern Lights College's Ecosystem restoration and Reclamation micro-credential. This program has been developed in collaboration between the college and Coastal GasLink.
- In July 2025, Coastal GasLink and TC Energy provided a contribution toward the Prince George Nechako Aboriginal Employment and Training Association Trades Access Program. This 13-week program provides opportunities for aspiring Indigenous apprentices to explore careers in trades. Training was delivered in partnership with the Construction and Specialized Workers Union. Eight participants completed the program in October 2025 and became registered as apprentices with SkilledTradesBC.
- During summer 2025, Coastal GasLink and TC Energy supported summer student programs hosted by Kitselas First Nation and Witset First Nation.
- In September 2025, Coastal GasLink provided a contribution to New Relationship Trust to support one bursary and three scholarships for Indigenous students from Northern B.C.
- In November 2025, Coastal GasLink entered into a new multi-year agreement with UNBC to support 12 Environmental Stewardship Awards and 21 Indigenous Community Development Awards. In addition to the student awards, Coastal GasLink contributed to Active Minds Youth Outreach Program advancing Science, Technology, Engineering, and Mathematics (STEM) in northern B.C.
- In November 2025, Coastal GasLink and TC Energy supported UBC's Geering Up-InSTEM program. The program visits remote Indigenous communities to deliver no-cost camps and workshops to Indigenous youth. Additionally, youth from Indigenous communities are invited for a weeklong campus visit to UBC to connect with mentors, inland life.

4.4.2. Mitigation Effectiveness in the Reporting Period

Based on feedback from SEEMP contacts during the reporting period, the implemented mitigation supported local education and training activities. Coastal GasLink continues to work with Indigenous groups and local communities on education and training initiatives.

4.5. COMMUNITY UTILITIES AND SERVICES: EMERGENCY SERVICES

In the Application, the following potential adverse effect was identified in relation to emergency services:

- increased demand on local emergency services

4.5.1. Activities

- Coastal GasLink continued to meet and communicate with local governments to provide project information relevant to emergency services. Regional districts and

municipalities are accountable for most emergency services provided throughout their jurisdiction.

- Coastal GasLink provided medical services on site to treat project personnel outside of the local health care system. As an alternative to local ambulance use, vehicle transport is provided for injured employees requiring treatment beyond the level provided on site.
- In June 2025, Coastal GasLink sponsored and attended the 2025 BC Fire Expo in Penticton, B.C.
- In July 2025, Coastal GasLink supported the City of Dawson Creek and the Dawson Creek Fire Department with the purchase of three automated external defibrillators (AEDs): one AED for each of their primary responding apparatuses.
- In July 2025, Coastal GasLink supported the Village of Fraser Lake and the Fraser Lake Fire Department with funding for the purchase of a forcible entry door prop, to help firefighters keep up with provincial firefighter standards in training.
- In August 2025, Coastal GasLink supported the District of Kitimat and the Kitimat Fire Department with funding for their Forcible Entry Training System (multi-force door), a critical asset in developing firefighter competency, enhancing public safety and building resilient communities.
- In August 2025, Coastal GasLink supported the District of Kitimat and the Kitimat Fire Department with funding for the purchase of a Holmatro cordless combination tool, a professional-grade, battery-operated hydraulic rescue device essential for rural emergency response.
- In September 2025, TC Energy provided a contribution toward the First Nations' Emergency Services Society's Firefighter Development Program.
- In October 2025, Coastal GasLink sponsored and attended the WHL Prince George Cougars Community Heroes Night Hockey Game in Prince George, B.C., in support and recognition of local first responders.

4.5.2. Mitigation Effectiveness in the Reporting Period

Coastal GasLink collaborated with local communities and service providers to ensure that local perspectives are considered in the Project's plans for emergency response. Mitigation measures were deemed effective, and no long-term or permanent direct adverse effects on local emergency services were observed.

4.6. COMMUNITY UTILITIES AND SERVICES: HEALTH CARE SERVICES

In the Application, the following potential adverse effect was identified in relation to health care:

- increased demand on health care services

4.6.1. Activities

- Coastal GasLink’s safety team continued to focus on worker and equipment interface, cargo management, excavation safety, congestion in work areas and preparing for the weather change.
- Safety Alerts were provided to employees and contractors related to safety awareness and lessons learned. During the reporting period, alerts were issued related to winter road conditions, situational awareness, wildlife, PPE, routine task hazards, and changing seasonal weather conditions.
- On-site medical staff and services at Mount Bracey Lodge met or surpassed WorkSafeBC mandated ratios for health care support during construction.
- In July 2025, Coastal GasLink provided sponsorship and attended the annual Prince George Cougars Alumni Spirit of the North Healthcare Foundation’s Golf Tournament in Prince George, B.C.
- In September 2025, Coastal GasLink sponsored and participated in the Spirit of the North HockeyFest in Prince George, B.C., in support of the Spirit of the North Healthcare Foundation.

During the reporting period, Mount Bracey Compressor Station personnel peaked at 360 and field crews completing reclamation work at the Huckleberry Lodge site peaked at 53. During this period, 6 job-related injuries occurred requiring workforce use of local health care services as described in Table 4-2. As shown in the table, there were no transfers to hospitals and clinics.

Table 4-2: Work-Related Incidents Affecting Local Health Care Services

Date	Incident Description	Ambulance Transfer Required	Treatment Location	Treatment Duration
August 2025	Worker installing carpet on I-beam felt discomfort and later twisted their body and experienced increased discomfort. Site medic recommended X-rays.	No	University Hospital of Northern BC (Prince George)	1 hr
September 2025	Worker rolled right ankle while walking; X-rays conducted.	No	University Hospital of Northern BC (Prince George)	1 hr
September 2025	Grinder in worker's hand slipped and lacerated worker's leg just above knee; sutures required.	No	University Hospital of Northern BC (Prince George)	1 hr

Date	Incident Description	Ambulance Transfer Required	Treatment Location	Treatment Duration
October 2025	While zip tying cables, a worker falls forward and strikes their head on an I-beam necessitating sutures.	No	University Hospital of Northern BC (Prince George)	1.5 hrs
November 2025	Worker inadvertently steps into a hydrovac hole, straining their leg muscle; X-rays and ultrasound conducted.	No	University Hospital of Northern BC (Prince George)	2.5 hrs
November 2025	Worker stepped slightly backwards into open pile hole approximately 1 ft deep, resulting in them losing balance and falling to the ground; examination and X-rays conducted.	No	University Hospital of Northern BC (Prince George)	1 hr

4.6.2. Mitigation Effectiveness in the Reporting Period

Since the beginning of construction in July 2024 through November 2025, the Project’s workforce has accrued 1,083,878 work hours. During the reporting period, workers spent 8 hours in local healthcare facilities related to 6 workplace incidents.

Coastal GasLink continues to collaborate and implement mitigation for potential effects from the Project’s workforce on local health care service providers.

4.7. COMMUNITY UTILITIES AND SERVICES: SOCIAL SERVICES

In the Application, the following potential adverse effect was identified in relation to social services:

- increased demand on community social services

4.7.1. Activities

- Coastal GasLink’s workforce accommodations and worksites continued the Project’s bottle recycling donation program to reduce waste.
- In August 2025, Coastal GasLink supported Mackenzie Community Services through support for the MCS Digital Wellness Program, in Mackenzie, B.C. The project focused on upgrading video conferencing equipment and technology to offer reliable and secure virtual counseling and invest in community infrastructure to improve mental health.
- In September 2025, TC Energy employees in Prince George fundraised for the Dallas Werbecky Memorial Walk – Move for Mood, and raised funds for mental health and suicide prevention programs across Northern B.C. delivered by the Canadian Mental Health Association.

4.7.2. Mitigation Effectiveness in the Reporting Period

SEEMP contacts reported no observed adverse effects on social services during the reporting period. No additional mitigation is required at this time.

4.8. COMMUNITY UTILITIES AND SERVICES: WASTE MANAGEMENT FACILITIES

In the Application, the following potential adverse effect was identified in relation to waste management:

- increase in waste flow to regional landfill, transfer station sites and wastewater treatment facilities

4.8.1. Activities

- See Appendix B for information related to the Project's construction waste volumes by region, destination and type.
- Coastal GasLink continued to engage with Prime Contractors and the workforce accommodation contractor to ensure that waste management procedures aligned with provincial regulations and local government expectations.
- Coastal GasLink's recycling programs reduced the flow of waste to regional landfills. During the reporting period, donations to community organizations from the proceeds of cans and bottles recycled at Mount Bracey Lodge and Mount Bracey Compressor Station were collected and will be donated to local charitable groups.

4.8.2. Mitigation Effectiveness in the Reporting Period

Coastal GasLink continues to work with Prime Contractors and local governments to implement and monitor waste management mitigation. Coastal GasLink will continue to monitor capacity constraints at regional landfills during construction.

4.9. COMMUNITY UTILITIES AND SERVICES: RECREATIONAL FACILITIES

In the Application, the following potential adverse effect was identified in relation to recreational facilities:

- increased demand on community recreational facilities

4.9.1. Activities

- Workforce accommodations are equipped with recreational facilities including exercise equipment, television, movies, games room, telephone and internet access.
- In June 2025, Coastal GasLink supported the District of Houston with funding for the Steelhead Park Playground, focusing on upgrading an aging playground in one of Houston's most iconic parks to better serve the needs of their growing community and attract visitors.

- In June 2025, Coastal GasLink provided sponsorship toward the Blueberry River Culture Camp, Nee Tahi Buhn Culture Camp and Wet'suwet'en First Nation Culture Camp.
- In July 2025, Coastal GasLink provided sponsorship toward Skin Tyee Nation Culture Camp.
- In July 2025, Coastal GasLink provided sponsorship and attended Pemmican Days and WestMo Days.
- In July 2025, Coastal GasLink provided a contribution toward the installation of Saulteau First Nation's playground at Carbon Lake.
- In August 2025, Coastal GasLink provided sponsorship and attended Doig River Rodeo, Halfway River Rodeo and Saulteau Culture Camp.
- In October 2025, Coastal GasLink supported the Spruce City Wildlife Association and their Cottonwood Island Nature Park restoration project in Prince George, B.C. The project consists of fish habitat restoration within a Nechako River side channel located in the Cottonwood Island Nature Park in Prince George.
- The Community Workforce Accommodation Advisor (CWAA) Program facilitated activities within Mount Bracey Lodge to promote community and culture.
 - In September, following requests from lodge residents, the CWAA Program installed a 10 ft. tipi in the outdoor recreational area at Mount Bracey Lodge, providing a culturally safe space for residents to smudge.
 - CWAA shared etiquette and information about smudging with the workforce. CWAA also hosted a smudge spray making workshop that was well attended.
 - In recognition of the National Day for Truth and Reconciliation, the CWAA Program provided Mount Bracey Lodge residents with information and resources about residential schools and Orange Shirt Day.
 - At the September 30 morning tailgate meeting, the Construction Monitoring & Community Liaison (CMCL) and CWAA Coordinators shared information about truth and reconciliation. The programs also provided the workforce with 'Every Child Matters' hard hat stickers, orange ribbons and orange shirts for those who didn't have one.
 - In response to significant demand, the CWAA Program reopened the Atawiy Market in October, selling toiletries and snacks at cost to the workforce. The Atawiy Market provides moments of connection with the workforce and reduces the need for residents to drive the Forest Service Road (FSR) to access personal and comfort items. In November, the Atawiy will also sell Indigenous crafts made by local artisans.
 - The CWAA Program also hosts regular programming for the workforce including:
 - bingo
 - holiday themed events and decorations
 - TV, movie and sports watch parties

- crafting workshops
- hosting morning coffee breaks

4.9.2. Mitigation Effectiveness in the Reporting Period

As presented in the Application and through monitoring, there continues to be no anticipated long-term or permanent adverse effects on recreational facilities that cannot be mitigated.

4.10. COMMUNITY UTILITIES AND SERVICES: EDUCATION SERVICES

In the Application, the following potential adverse effect was identified in relation to education:

- increased demand for education services

4.10.1. Activities

- In June 2025, Coastal GasLink attended the 2025 Project Heavy Duty Program recognition lunch for program sponsors in Fort St. John, B.C. Project Heavy Duty provides a one-week experience for high school students to learn about and operate heavy equipment such as crawlers, dozers, excavators and rock trucks.
- In August 2025, Coastal GasLink and TC Energy supported Saúlteau First Nation's Back to School Program.
- During summer 2025, Coastal GasLink supported Wet'suwet'en First Nation's Awards Day, an annual celebration of the achievements in education from grades K-12.
- In October 2025, Coastal GasLink provided a contribution to Junior Achievement of B.C. to support the JA Company Program for Indigenous Learners, which focuses on high school students.
- In October 2025, Coastal GasLink provided a contribution to North Star Remote Learning to support a remote training program to promote interest in the electrical trade for Indigenous high school students.
- In November 2025, Coastal GasLink and TC Energy supported School District 60 with funding to invest in shop equipment upgrades.

4.10.2. Mitigation Effectiveness in the Reporting Period

SEEMP contacts reported no observed adverse effects to educational services during the reporting period. No additional mitigation is required at this time.

4.11. COMMUNITY UTILITIES AND SERVICES: GOVERNMENT SERVICES

In the Application, the following potential adverse effect was identified in relation to government services:

- increased demand on government services

4.11.1. Activities

- Coastal GasLink continued proactive communication with government agencies regarding anticipated schedules and regional workforce volumes.
- In August 2025, Coastal GasLink provided a sponsorship and attended the McLeod Lake Indian Band Annual General Meeting.
- In September 2025, Coastal GasLink sponsored and attended the Union of B.C. Municipalities Convention in Victoria, B.C.

4.11.2. Mitigation Effectiveness in the Reporting Period

SEEMP contacts reported no observed adverse effects to government services during the reporting period. No additional mitigation is required at this time.

4.12. COMMUNITY UTILITIES AND SERVICES: HOUSING AND COMMERCIAL ACCOMMODATIONS

In the Application, the following potential adverse effect was identified in relation to housing and commercial accommodation:

- reduction in available rental housing and commercial accommodation

4.12.1. Activities

- Coastal GasLink housed workers at Mount Bracey Lodge during the reporting period to mitigate adverse effects on regional infrastructure and services, including rental housing and commercial accommodation. See Appendix C for the Project's monthly planned and observed peak workforce accommodation occupancy.

4.12.2. Mitigation Effectiveness in the Reporting Period

During the reporting period, Coastal GasLink continued to engage with communities to understand observed effects on local housing availability in the region.

As presented in the Application, there are no anticipated long-term or permanent effects on rental housing or commercial accommodation that cannot be mitigated.

4.13. TRANSPORTATION INFRASTRUCTURE AND SERVICES: TRAFFIC

In the Application, the following potential adverse effects were identified in relation to traffic:

- increased traffic volumes from transportation of workers, supplies and equipment leading to decreased road safety
- increase in rail traffic resulting from the shipment of project-related materials

- increased air passengers in local and regional airports

4.13.1. Activities: Road Traffic

- Coastal GasLink engaged with industrial road user groups to discuss road and traffic conditions.
- Coastal GasLink implemented additional traffic management practices and increased hazard warning signage along the primary travel route.
- Safety Alerts were provided to employees and contractors related to safety awareness.
- Additional road safety measures implemented in summer 2025 included:
 - installation of jersey barriers at certain locations where the primary travel route has tight turns directly adjacent to Tacheeda Lakes
 - installation of temporary Starlink wireless network service box at the start of the primary travel route, off Highway 97, improving communications and facilitating the ability to have check in/out system if needed
- As part of ongoing maintenance of the primary travel route, emergency repairs were completed to prevent a potential washout of the FSR road surface. Parsnip Bridge wear decking was replaced to support future overweight transports and another bridge approach was optimized with local forestry support to enhance safety and reliability.
- Extraordinary oversized and overweight compressor station loads (e.g., gas turbines and compressor units) required detailed analysis by a qualified professional on the primary travel route to secure Ministry of Forests approval for the haul; a successful August trial run using an unloaded trailer validated recommendations.

4.13.2. Activities: Rail Traffic

During the reporting period, project-related rail traffic activities remained limited with no effect on regional service capacity.

4.13.3. Activities: Air Traffic

During the reporting period, the Project's workforce used regional air transportation services with no observed effects reported from local communities.

4.13.4. Mitigation Effectiveness in the Reporting Period

During the reporting period, mitigation related to safe road use continued to be implemented. As presented in the Application and through monitoring, there continues to be no anticipated long-term or permanent adverse effects on transportation that cannot be mitigated.

4.14. TRANSPORTATION INFRASTRUCTURE AND SERVICES: NAVIGABILITY OF WATERWAYS

In the Application, the following potential adverse effect was identified in relation to navigation:

- disruption of movement on navigable waterways

4.14.1. Activities

With no navigable waterways affected by Mount Bracey construction, Coastal GasLink did not issue any work-related notifications to regulators or the public. Notifications are tracked by the Federal Common Project Search found at [Common-Project-Search.Canada.ca](https://www.common-project-search.ca).

4.14.2. Mitigation Effectiveness in the Reporting Period

With no navigable waterways affected by Mount Bracey construction, there were no reports of Coastal GasLink work disrupting movement on a navigable waterway during the reporting period. As presented in the Application and through monitoring, there are no anticipated long-term or permanent adverse effects on navigable waterways that cannot be mitigated.

5.0 SEEMP REGULATORY INSPECTIONS

No BC EAO SEEMP compliance inspections took place during the reporting period. During Phase 1 construction, Coastal GasLink had six administrative and three field-based SEEMP inspections and was found fully compliant in all cases.

BC EAO inspection records for Coastal GasLink are publicly available on the BC EPIC website located at <https://projects.eao.gov.bc.ca/p/588511c4aaecd9001b825604/project-details>.

6.0 ADAPTIVE MANAGEMENT

No adaptive management was required during the reporting period. If corrective action is determined through ongoing monitoring, it will be identified in the reporting period the action is implemented.

7.0 CLOSING

During this reporting period, construction activities continued on the Mount Bracey Compressor Station. The size of the field-based workforce fluctuated between 141 and 360. In addition, reclamation activities were completed at the former site of Huckleberry Lodge in August 2025 with a peak workforce during summer reclamation activities of 53. There were limited observed project effects on economy, community infrastructure and services and transportation.

Coastal GasLink continues to communicate and engage with SEEMP contacts at the community and provincial levels and will adjust its management approach should the need arise. During this reporting period there have been no detectable adverse effects that would change the predictions of the socio-economic assessment.

SEEMP status reports are developed on a semi-annual basis as required by Condition #24 of the Project's EAC. Coastal GasLink has initiated a new series of SEEMP status reports that will reflect the monitoring and reporting on effects related to new construction such as compressor facilities. This is the third SEEMP status report related to Coastal GasLink's additional facilities including Mount Bracey Compressor Station. It describes SEEMP implementation from June through November 2025. Table 1-1 provides a summary of the Project's SEEMP status reports.

The SEEMP provides a framework for Coastal GasLink to receive feedback and address concerns from potentially affected stakeholders and communities. Indigenous groups, local governments and provincial agencies are encouraged to contact Coastal GasLink if a concern is identified related to the Project's SEEMP implementation. Issues can be identified directly by telephone, email or mail:

<i>Key Indicator: Recreational Facilities</i>			
<i>Increased demand on community recreational facilities</i>	<i>EA Table 15-18, 15-20, 15-22 and 15-24</i>	<ul style="list-style-type: none"> Continue to communicate with municipal recreation facility operators to confirm the proposed Project construction and workforce schedules to ensure municipal recreational service providers have sufficient notice regarding possible increased use. 	In Progress
	<i>EA Table 15-18, 15-20, 15-22 and 15-24</i>	<ul style="list-style-type: none"> Ensure workers will have access to recreational facilities in the construction camps where they reside during the construction phase. These facilities will include exercise equipment within the camp and access to electronics will be available (e.g., television, movies). 	In Progress
	<i>EA Table 15-18, 15-20, 15-22 and 15-24</i>	<ul style="list-style-type: none"> Communicate with municipal recreational facility operators to identify service gaps and resulting issues. 	In Progress
<i>Key Indicator: Education Services</i>			
<i>Increased demand for education services</i>	<i>EA Table 15-18, 15-20, 15-22 and 15-24</i>	<ul style="list-style-type: none"> Communicate with educational and training service providers well in advance of proposed project construction regarding schedules, workforce, skills requirements and expected demands. 	Complete
<i>Key Indicator: Government Services</i>			
<i>Increased demand on government services</i>	<i>EA Table 15-18, 15-20, 15-22 and 15-24</i>	<ul style="list-style-type: none"> Communicate with government agencies well in advance of proposed Project construction regarding schedules, workforce and expected demands. Government agencies and services used will be specified when proposed Project details are finalized. 	Complete
<i>Key Indicator: Housing and Commercial Accommodation</i>			
<i>Reduction in available rental housing and commercial accommodation</i>	<i>EA Table 15-18, 15-20, 15-22 and 15-24</i>	<ul style="list-style-type: none"> Communicate with hotel associations, commercial accommodation providers (i.e., campgrounds, hotels and motels, RV parks) and chambers of commerce when proposed Project construction schedules are known to ensure accommodation providers are able to plan for increased activity. 	In Progress
	<i>EA Table 15-18, 15-20, 15-22 and 15-24</i>	<ul style="list-style-type: none"> Communicate with community representatives to assess the current housing availability and options for hosting worker's families. 	Complete

POTENTIAL ADVERSE EFFECTS	REGULATORY REFERENCE	MITIGATION ¹	STATUS
	<i>EA Table 15-18, 15-20, 15-22 and 15-24</i>	<ul style="list-style-type: none"> If accommodations are reserved for personnel of the proposed Project, and are determined not to be needed, request that the Contractor release the rooms. 	In Progress
	<i>EA Table 15-18, 15-20, 15-22 and 15-24</i>	<ul style="list-style-type: none"> Communicate with hotel associations, commercial accommodation providers (i.e., campgrounds, hotels and motels, RV parks) and chambers of commerce three months before construction, regarding known reasonably foreseeable future development and activities (Appendix 3-A), to understand and address potential overlaps and potential issues with a reduction in available rental housing and commercial accommodation. 	Complete
VALUED COMPONENT: TRANSPORTATION INFRASTRUCTURE AND SERVICES			
<i>Key Indicator: Traffic</i>			
<i>Increased traffic volumes from transportation of workers, supplies and equipment leading to decreased road safety</i>	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Implement the Traffic Control Management Plan in the EMP (Appendix 2-A of the Application) and the Access Control Management Plan. 	In Progress
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Before construction activities, use community media outlets such as newspapers and radio stations, and email updates to announce the location and schedule of construction activities. 	In Progress
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Confirm the proposed Project construction schedule and road crossing procedures with BC Ministry of Transportation and Infrastructure staff before construction activities. 	Complete
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Communicate with RCMP detachments to define traffic safety concerns and mitigation before proposed Project construction. 	Complete
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Coastal GasLink will transport pipe materials to the proposed Project area by rail, where off-loading (rail sidings) are available and where practical. 	Complete
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Access points to the right-of-way (ROW) will be flagged and signed to discourage public use. 	In Progress
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Construction personnel will be transported between construction yards, construction camps and the construction site by multi-passenger vehicles, to the extent practical, to reduce vehicle traffic. 	In Progress

POTENTIAL ADVERSE EFFECTS	REGULATORY REFERENCE	MITIGATION ¹	STATUS
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Motorized vehicle traffic, including all-terrain vehicle (ATV), Argo and snowmobile traffic, will be confined to the approved route, access roads or trails except where specifically authorized by the appropriate regulatory authority. 	In Progress
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Vehicles will be limited to travel on the access roads for which they are designed. Most vehicles are able to turn around within the width of the construction ROW. Stringing trucks require extra turning radius. Consequently, approaches to the pipeline ROW or existing public roads will be wider when used for stringing trucks. Where turnarounds are needed on the ROW, extra space will be necessary on the travel side of the ROW. Previously disturbed areas will be used for this purpose, where practical. 	In Progress
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Efforts to control off-road vehicle use will be coordinated with the appropriate authorities and conducted until the ROW has been satisfactorily reclaimed. All proposed Project-related vehicles will follow applicable traffic, road-use and safety laws. 	In Progress
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Communication with communities where known traffic issues exist once the proposed Project schedule is confirmed. 	In Progress
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Communication with forest licensees to address cumulative road use issues. 	In Progress
<i>Increase in rail traffic resulting from the shipment of Project-related materials</i>	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Communicate with CN Rail to confirm rail capacity, siding availability, schedules and potential issues related to shipping pipe materials by rail. 	Complete
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Work with community representatives to identify suitable stockpile sites for pipe material, where practical. Specific selection would consider proposed Project requirements, access roads and general site conditions. 	Complete
<i>Increased air passengers in</i>	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Communicate with local and regional airport authorities of proposed Project construction activities to inform them of proposed Project schedules. 	Complete

POTENTIAL ADVERSE EFFECTS	REGULATORY REFERENCE	MITIGATION ¹	STATUS
<i>local and regional airports</i>	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Before construction activities, use community media outlets such as newspapers and radio stations to announce the location and schedule of construction activities to avoid impacts on access to air travel by residents. 	In Progress
<i>Key Indicator: Navigability of Waterways</i>			
<i>Disruption of movement on navigable waterways</i>	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Adhere to watercourse crossing mitigation outlined in Section 7 of the Application. 	Complete
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Obtain necessary approvals under <i>Navigable Waters Protection Act</i>, as required. 	Complete
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Make the Project construction schedule and location maps available to recreational user groups and other members of the public to avoid conflict with planned activities. 	In Progress
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> If directed by the appropriate regulatory authority, install warning signs along the banks both upstream and downstream of the crossing to caution users of a navigational hazard, where appropriate. 	Complete
	<i>EA Table 15-25, 15-27 and 15-31</i>	<ul style="list-style-type: none"> Discuss with Transport Canada to ensure that appropriate procedures were used for navigable waterway crossings. 	Complete

**APPENDIX B: PROJECT WASTE VOLUMES BY DESTINATION AND TYPE,
APRIL – SEPTEMBER 2025**

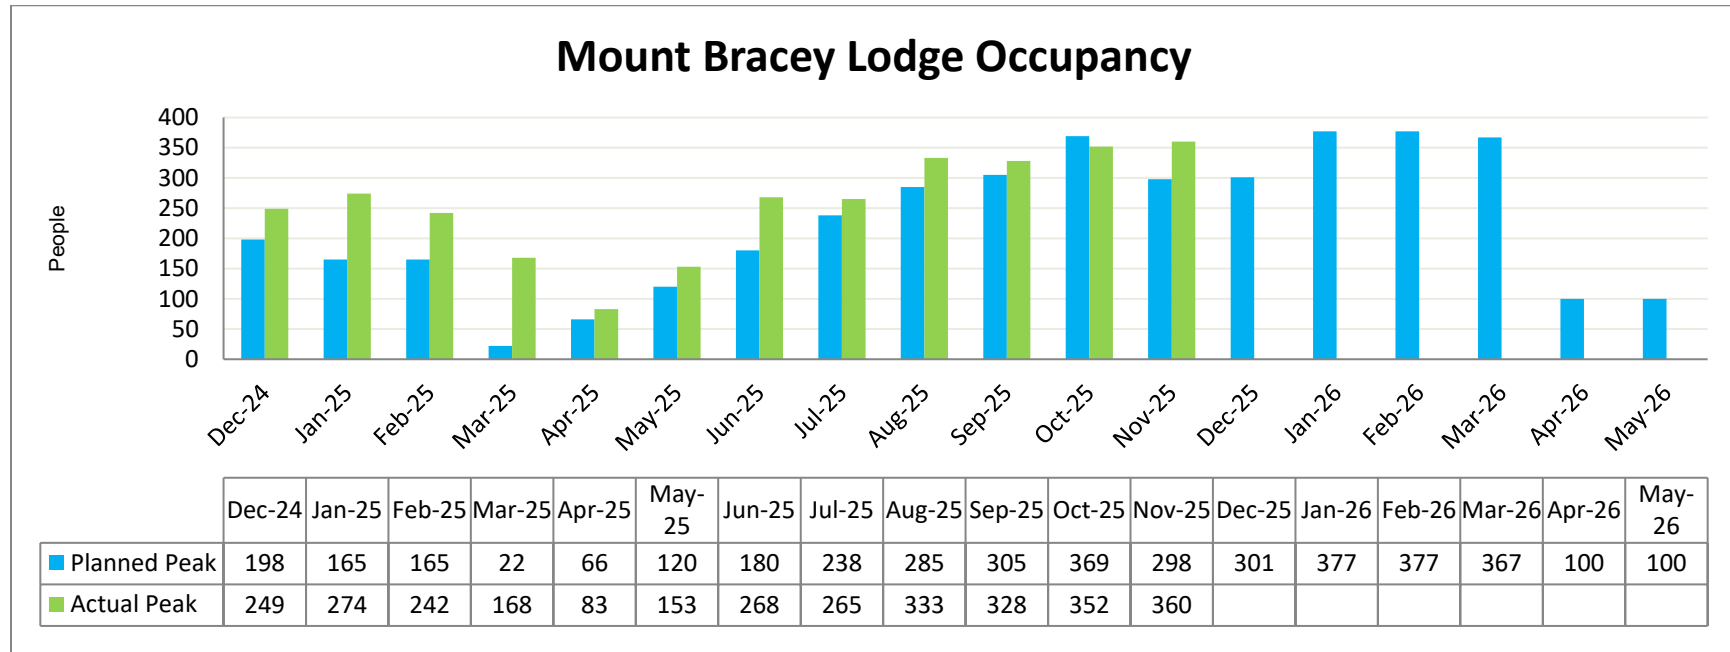

The following data has been supplied by Prime Contractors for the period from April to September 2025.

Waste Type	Receiver	Q2 2025 Quantities	Q3 2025 Quantities
Mount Bracey Compressor Station & Mount Bracey Lodge			
Garbage and general construction waste	Chetwynd Landfill	22.22MT	147.70 MT
	Foothills Landfill	18.05 MT	62.82 MT
Contaminated soil	GFL Prince George	27 MT	0
Liquid waste (nonhazardous)	GFL Prince George	7 m ³	17.6 m ³
Sewage waste	District of Chetwynd Sewage Treatment Plant	143.75 m ³	335.88 m ³
	City of Prince George Shelly Lagoon	0	48 m ³
Recyclables, cardboard	Chetwynd Landfill, E360 Solutions, Prince George, Foothills Landfill	3.64 MT	6.95 MT
Recyclables, metal	ABC Recycling, Foothills Landfill	0	0
Recyclables, steel	ABC Recycling	58.84 MT	66.60 MT
Recyclables, concrete	Polar Ventures, Prince George	0	90 MT
Recyclables, cooking oil	McLeod's By Product	0	1 m ³
Huckleberry Lodge Site Reclamation			
Garbage and general construction waste	Knockholt Landfill	4.91 MT	N/A
<p>Notes: Sewage from Mount Bracey Lodge was disposed of in the provincially permitted septic field at the Lodge.</p> <p>Definitions:</p> <ul style="list-style-type: none"> • Garbage and construction waste is solid waste that will be accepted on payment of a standard tipping fee at a public landfill, including non-recyclable plastics, food waste and clean construction waste (e.g., waste wood, wire, geotextiles). • Contaminated soil is gathered up from fuel spill areas. Depending on the level of contamination, it may be disposed of at public landfills or at permitted private facilities. • Liquid non-hazardous waste is liquid waste that is non-hazardous and is not sewage: sludge, hydrocarbon less than 3%, liquid waste, contaminated snow. 			

- **Industrial waste** covers materials that are not accepted at public landfills and must be transported to a permitted private facility. The list of possible materials includes: hydrocarbon products, cleaning chemicals, used oil, filters, grease, rags, solvents, antifreeze, lube tubes, filters; items containing chemicals and heavy metals (e.g., batteries, paints, glues, epoxy coating; and medical waste).
- **Sewage** is liquid waste that will be accepted on payment of a standard disposal fee at a sewage treatment facility operated by a local government or First Nation.
- **Recyclables** are materials that are deemed by the hauler to be recyclable according to standard lists maintained by recycling facilities and materials brokers. In some cases, recyclables may be disposed of at landfills due to lack of markets.

**APPENDIX C: WORKFORCE ACCOMMODATIONS – PLANNED VS. ACTUAL PEAK
OCCUPANCIES**

Mount Bracey Lodge: planned vs actual peak occupancy

Notes:

- Data is current as of November 30, 2025.
- Data is shown for the past year of Mount Bracey Lodge operations and is forecasted until end of 2025 for the near-term outlook. The lodge is expected to be in operation until the end of 2026.
- Peak occupancy is recorded as the highest occupancy day within a given month.
- Peak occupancy includes field-based Strike Group workforce and their contractors, Coastal GasLink staff and its contractors, LNG Canada, Construction Monitor Community Liaison, Community Workforce Accommodation Advisor and Mount Bracey Lodge staff (Horizon North and their contractors).
