TransCanada/ Coastal GasLink,

RE: Coastal GasLink Pipeline Project

Kitimat Economic Development Association would like to express their approval for the above noted project. The benefits to our community and the Haisla Nation will be immense; from employment to an influx of revenue to the town of Kitimat and its neighbouring communities. This project is important not to just our area but British Columbia and Canada as a whole. The LNG industry will supply our town, province and nation with the much needed revenue to continue supplying us with services that are beneficial to the country.

Yours truly,

Debbie Oviatt

Director
