*Dean Patry, President
Prince Rupert Gas Transmission Project
760 Kinsmen Place,
Prince George, B.C. V2M 0A8*

Dear Mr. Gateman and Mr. Patry,

On behalf of the City of Terrace, I am writing to express support for TransCanada's Coastal GasLink Pipeline and the Prince Rupert Gas Transmission Projects, and the overall development of the LNG Industry in Northwest B.C.

While the projects would not be located in Terrace we anticipate a number of benefits from the Coastal GasLink (CGL) Pipeline and the Prince Rupert Gas Transmission (PRGT) Projects for our residents. As the service and supply centre for the Northwest, Terrace is the location for many of the region's business, retail, medical, educational and Government services. The economic activity from local employment and supply chain spin-offs will provide direct economic benefit to our community.

The CGL Pipeline and PRGT Projects will also generate revenue for the Provincial Government. The City is a member of the Northwest British Columbia Resource Benefits Alliance, which is seeking a revenue sharing agreement with the Province to ensure local communities receive their fair share of revenues from resource development in the region. Revenue sharing with the Province will enable us to maintain healthy and sustainable communities into the future and would ensure social benefits from projects like the CGL Pipeline and PRGT Projects in addition to economic benefits.

We recognize the contributions made by CGL, PRGT and TransCanada towards education through Northwest Community College and other training facilities in Terrace and look forward to seeing the graduates from these programs take advantage of the employment opportunities that the CGL Pipeline and PRGT Projects will have available for them.

We are excited for this project to come to fruition and to see the benefits that will come to Northwest B.C. through the responsible development, construction and mobilization of the Coastal GasLink Pipeline and the Prince Rupert Gas Transmission Projects.

Sincerely,
