

CONSTRUCTION NOTIFICATION

Coastal GasLink is committed to creating an extraordinary legacy of safety and respect for all people, communities and the environment. As part of this commitment we are keeping our neighbours along the project route informed on construction activities along the project route. Please note the following information:

What: Controlled blasting activities are expected to continue along the project right-of-way into March 2020. All blasting activities will be done in accordance with provincial and federal regulations.

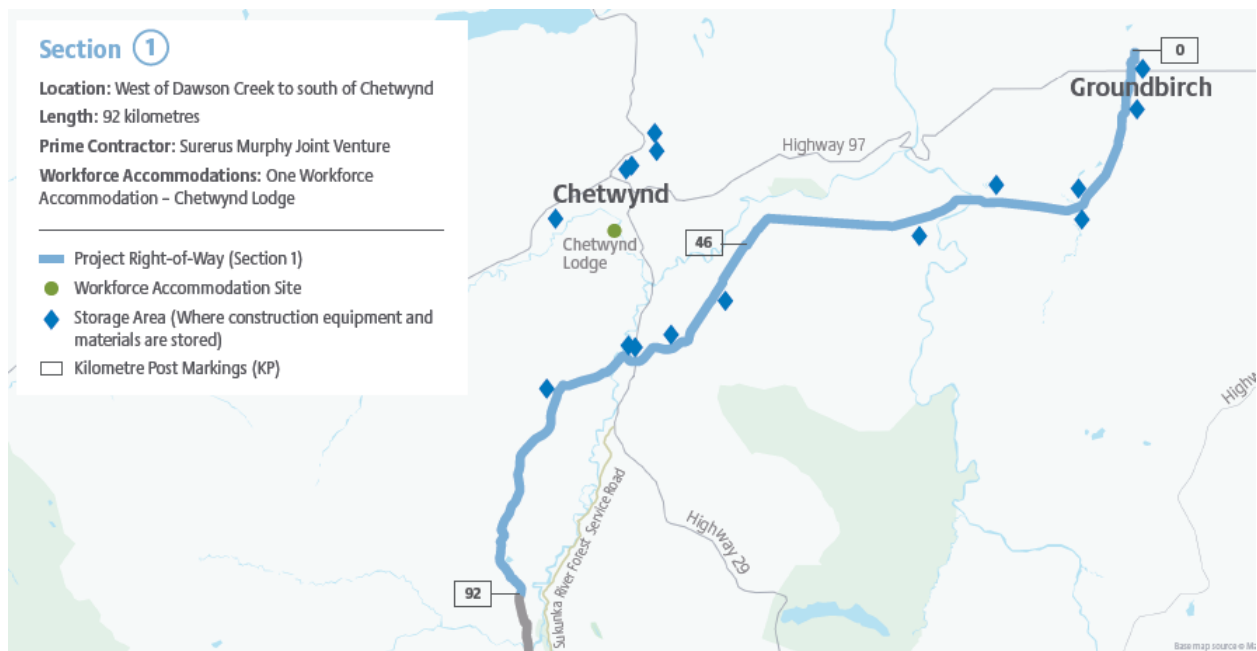

When: Blasting will be conducted daily between 9 a.m. and 6 p.m. and will continue until the end of March 2020 in some areas.

Where: These activities will occur within KP 48.7 to 69.5 and KP 119.5 to 132.2 along the project right-of-way with the nearest location approximately 11 kilometres southeast of Chetwynd, B.C.

Expected Duration: As an extension to the previous blasting notification on [Dec. 20, 2019](#), this activity is expected until the end of March 2020. Depending on the area, blasting will last between one day to two months.

Potential Impact: While there are no anticipated permanent road closures required as part of this activity, public access to this segment of the project right-of-way and a surrounding safety zone will be restricted during this period. This segment of the project right-of-way does not intersect any major public roads and no residences are located within 150 metres of the area. Temporary restrictions to local forestry roads may be required during blasting depending on the scope and location of work. It is not expected that these activities will result in any detectable sound or vibration beyond the immediately work area.

Maps: Please see the following page.

Questions regarding these activities or general project construction can be directed via email to coastalgaslink@tcenergy.com or by phone to 1-855-633-2011.
