

CONSTRUCTION NOTIFICATION

Coastal GasLink is committed to creating an extraordinary legacy of safety and respect for all people, communities and the environment. As part of this commitment we are keeping our neighbours along the project route informed on construction activities happening near their community. Please note the following information:

What: Controlled blasting activities are expected to begin late-June 2020 along the project right-of-way. All blasting activities will be done in accordance with provincial and federal regulations.

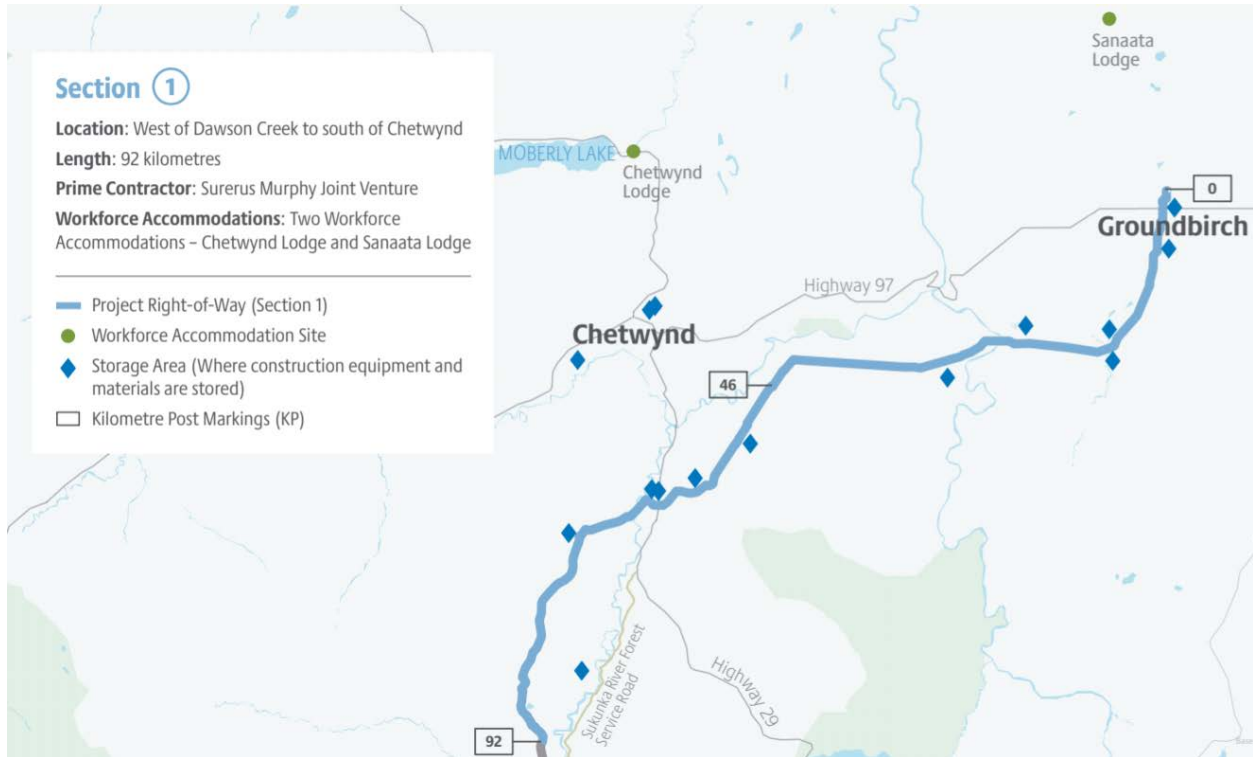

When: Blasting will be conducted daily between 9 a.m. and 4 p.m. and will continue until the end of August 2020 in some areas.

Where: These activities will occur within KP 48 to KP 70 along the project right-of-way with the nearest location approximately 11.5 kilometres southeast of Chetwynd, B.C. and 50 kilometres northwest of Tumbler Ridge, B.C.

Expected Duration: Late-June 2020 through to the end of August 2020. Depending on the area, blasting will last between one day to two months.

Potential Impact: While there are no anticipated permanent road closures required as part of this activity, public access to this segment of the project right-of-way and a surrounding safety zone will be restricted during this period. This segment of the project right-of-way intersects a major public road (Highway 29) and will require temporary restrictions during blasting. No residences are located within 150 metres of the area along this segment of the project right-of-way. Temporary restrictions to local forestry roads may be required during blasting depending on the scope and location of work. It is not expected that these activities will result in any detectable sound or vibration beyond the immediately work area.

Map: Please see the following page.

Questions regarding these activities or general project construction can be directed via email to coastalgaslink@tcenergy.com or by phone to 1-855-633-2011.
