

CONSTRUCTION NOTIFICATION

Coastal GasLink is committed to creating an extraordinary legacy of safety and respect for all people, communities and the environment. As part of this commitment we are keeping our neighbours along the project route informed on construction. Please note the following information:

What: Controlled blasting activities will continue in Section 8 along the project route, roads and ancillary sites. All blasting activities will be done in accordance with provincial and federal regulations.

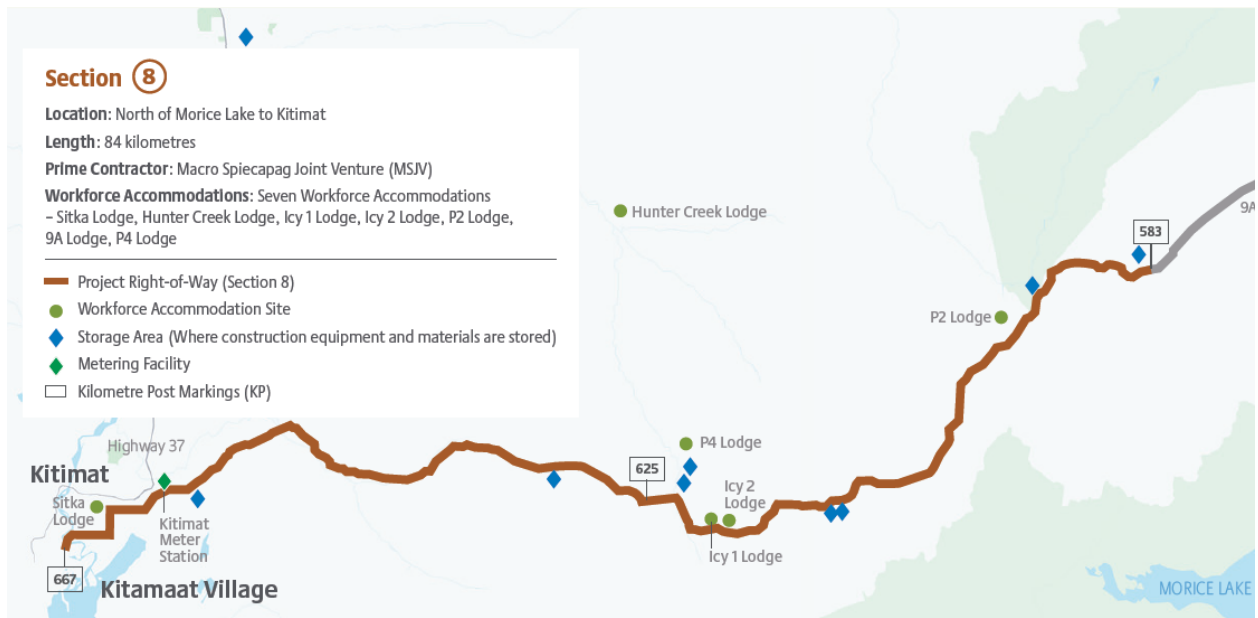

When: Beginning on January 1, 2022, blasting will be conducted daily between 8 a.m. and 6 p.m. and will continue until the end of 2022 in some areas.

Where: Blasting activities will occur between KP 583 to KP 659 along the project route with the nearest community, Kitimat, B.C., located approximately 8 kilometres west of this activity.

Expected Duration: January 1, 2022 through to the end of December, 2022. Depending on the location, blasting activities in any particular location may occur for one or more days during this timeframe.

Potential Impact: While there are no anticipated permanent road closures required as part of this activity, public access to this segment of the project route and a surrounding safety zone will be restricted during this period. There are no residences located within 1,000 metres of the area. The project route does not intersect with any major highways in this area, however some restrictions to local forestry roads may be required during blasting depending on the scope and location of work. It is not expected that these activities will result in any detectable sound or vibration beyond the immediate work area.

Map: Please see map(s) below.

Questions regarding these activities or general project construction can be directed via email to coastalgaslink@tcenergy.com or by phone to 1-855-633-2011.
