

CONSTRUCTION NOTIFICATION:

Phase 2 Construction Begins in 2027

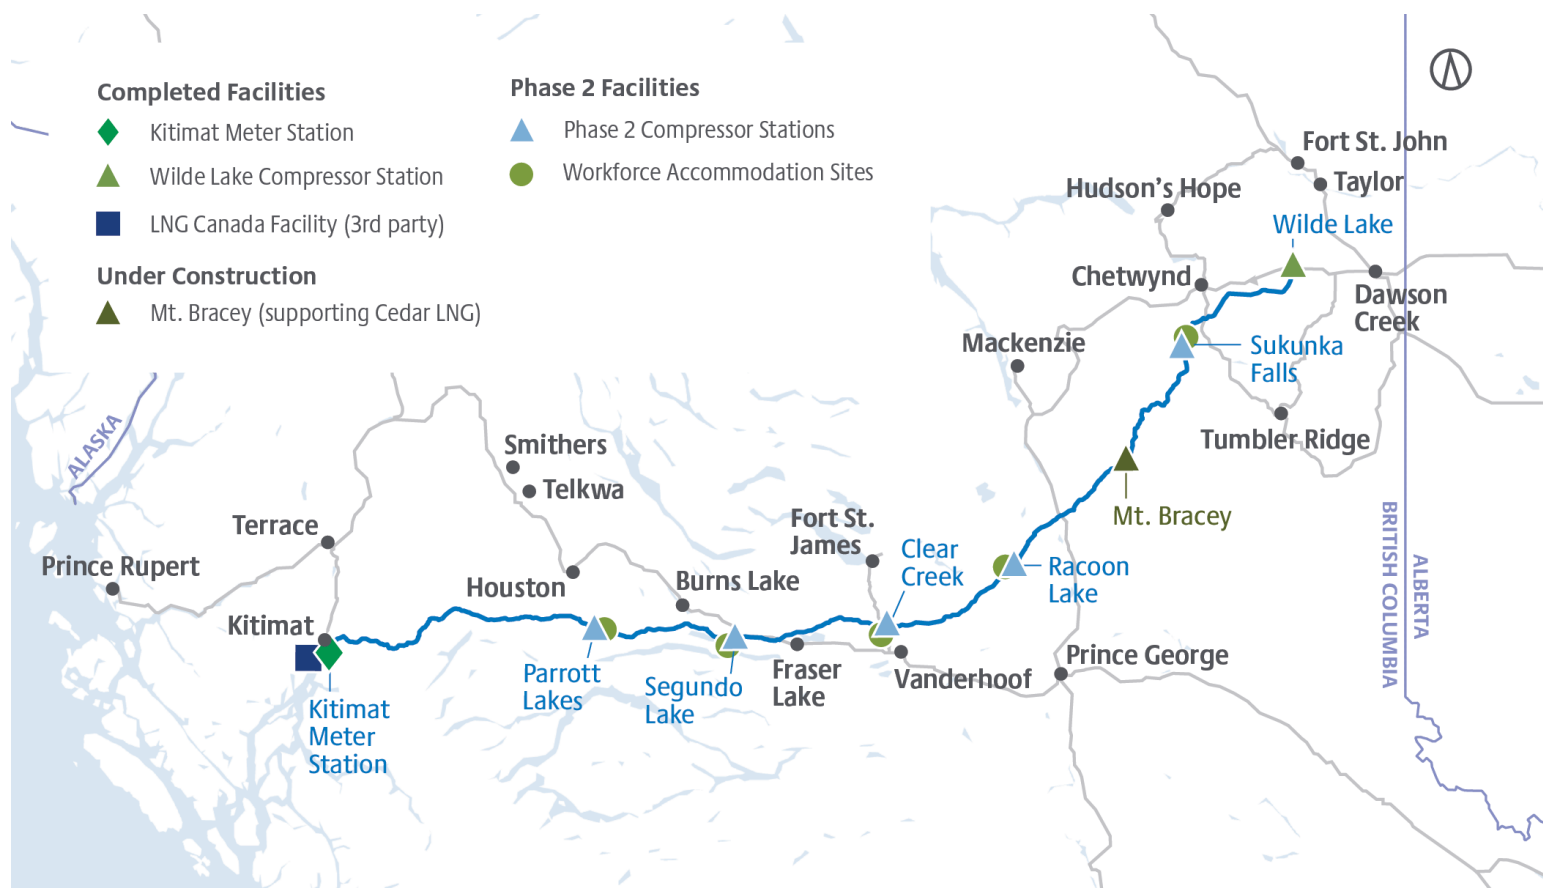

Coastal GasLink (CGL) is committed to keeping communities informed as we advance facility and related construction activities on Phase 2. This notice provides information about upcoming activities and how to stay informed as planning progresses. Additional site-specific notifications and community updates will be shared as more information becomes available.

What:

Early activities may include earthworks and site preparation, establishment of temporary workforce accommodations, road access improvements, equipment mobilization and other construction preparation activities.

Where:

Initial construction activities are anticipated to focus on the Clear Creek, Parrott Lakes and Racoon Lake compressor station locations. Please refer to the map below.

When:

Construction activities are expected to begin as early as Feb. 1, 2027. Construction of the remaining Phase 2 facilities will advance in stages, as planning and permitting progress. More information will be shared as plans and schedules are finalized.

What is a compressor station? Read our [Fact Sheet](#) to learn more.

What to expect:

Activities will vary by location and stage of construction. As work begins, communities may notice:

- Increased movement of people, equipment and materials
- Potential increased traffic near compressor sites
- Ongoing engagement with Indigenous Nations, local governments, landowners and stakeholders

Staying informed

We are committed to keeping communities informed as Phase 2 moves forward.
