

Post-construction Update

June 2025

Coastal GasLink

Post-construction activities nearing completion

With mechanical completion of Coastal GasLink Phase 1 achieved in November 2023, we continue to focus on safe and reliable operations of the pipeline system. The final post-construction activities are nearly complete.

Remaining work for 2025:

1. Site reclamation at Huckleberry Lodge is expected to be completed by September 2025.
2. Standard maintenance work will be conducted across all project sections.
3. Monitoring of the right-of-way for effectiveness of Erosion and Sediment Control continues.

While this will be our final Post-construction Update for Phase 1, we encourage you to stay up to date by visiting our website and following us on our social channels @CoastalGasLink.

Committed to communities and the environment

The Post-Construction Monitoring Program is currently underway. Through this program, we are monitoring and assessing the construction footprint to validate the return of function of watercourses, wetlands and wildlife.

Learn how we can help **Build Strong** communities

Our social impact program, Build Strong, invests in organizations that are vital to our communities and crucial for our business.

Taking Safety Seriously. Every step of the way.

When living and working around pipelines, you need to know the facts so that you can help keep your family, worksite or community safe. You can visit www.ClickBeforeYouDig.com to find your local One-Call service and information about various situations that could pose risks to pipelines as well as other useful safe-digging rules and regulations for B.C. In case of emergency, call **1-888-982-7222**

Let's stay connected

We look forward to continuing to work together to deliver a lasting legacy of safety and respect and encourage you to reach out with any questions.
