

## Water Crossing Notification

*Coastal GasLink is committed to creating an extraordinary legacy of safety and respect for all people, communities and the environment. As part of this commitment we are keeping our neighbors along the project route informed on construction activities happening near their community. Please note the following information:*

**What:** Direct Pipe Installation (DPI) construction activities will be taking place along the Crooked River.

**Direct Pipe Method:** DPI is a hybrid of horizontal directional drilling and micro tunneling (a pipe jack operation that utilizes a micro tunneling bore machine). This method will minimize disruption to instream activities, the surrounding environment, fish habitat and the riverbank. To learn more about how we take care of our rivers and streams, please visit [coastalgaslink.com](http://coastalgaslink.com).

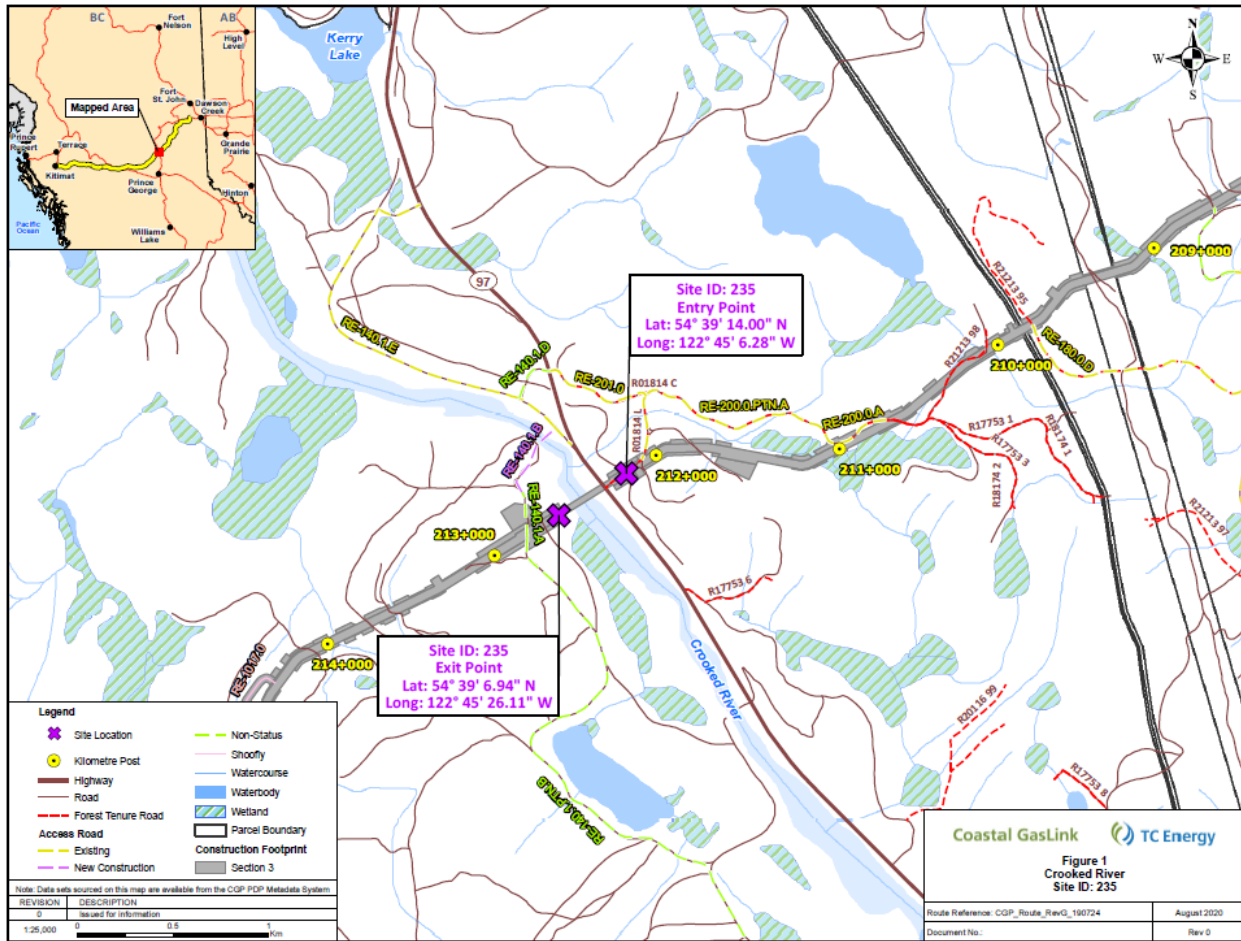

**When:** Beginning on September 14, 2020 construction activities will take place 24 hours per day and continue until October 16, 2020.

**Where:** Construction activities will occur at KP 212+200 to KP 212+600 DPI under Highway 97 and Crooked River with the nearest community of Bear Lake, B.C., located approximately 18 kilometers south of this activity.

**Expected Duration:** September 14, 2020 through to October 16, 2020.

**Potential Impact:** Public access to this segment of the Crooked River via watercraft is not restricted at this time. Only the DPI entry and exit pads will be restricted during this period. There are no residences located within this area and it is not expected that these activities will result in any detectable sound or vibration beyond the immediate work area.

**Map:** Please see the following page.

Questions regarding these activities or general project construction can be directed via email to [coastalgaslink@tcenergy.com](mailto:coastalgaslink@tcenergy.com) or by phone to 1-855-633-2011
