As per the Integrated Pest Management Regulation of British Columbia, Section 61(1) notice is given that a draft Integrated Vegetation Management Plan (IVMP) has been prepared for the Coastal GasLink Pipeline Project (the Project). The purpose of this plan is to provide a framework to manage the growth and spread of invasive plants and noxious weeds and to control undesirable vegetation required during construction and operation of the Project.

The geographical areas covered by this proposed IVMP overlap with Peace River Regional District, Fraser Fort George Regional District, Regional District of Bulkley-Nechako, Regional District of Kitimat-Stikine, and the District of Kitimat. Specifically, these areas include locations near the communities of Dawson Creek, Fort St. John, Groundbirch, Chetwynd, Prince George, Vanderhoof, Fraser Lake, Burns Lake, Houston, Smithers, Kitimat, Terrace. The IVMP will apply to all components of the Project including the pipeline right-of-way, compressor and meter station sites, access roads and ancillary sites. The IVMP will be active from 2020 to 2025.

Herbicide applications are intended within the areas to which the IVMP applies to control invasive and noxious weeds and undesirable vegetation. The herbicides that may be used under this IVMP are included in the table.

A person wishing to contribute information about a proposed treatment site, relevant to the development of the pest management plan, may send copies of the information to the applicant at the address above within 30 days of the publication of this notice.

Coastal GasLink Pipeline Project

*Trade Name(s)	Active Ingredient
Telar XP	Chlorsulfuron
Lontrel 360/Transline	Clopyralid
Banvel VM	Dicamba
Clearview Brush	Aminopyralid/ Metsulfuron methyl
Milestone	Aminopyralid
Hasten NT	Methyl and ethyl oleate (esterified vegetable oil)
Tordon 22K	Picloram
2,4-D Amine 600 (Ester 700)	2,4-D
MCPA Ester 600 (Amine 600)	MCPA
Roundup WeatherMax	Glyphosate
Roundup Transorb	Glyphosate
Arsenal	Imazapyr
Garlon RTU	Triclopyr
Navius VM	Aminocyclopyrachlor Metsulfuron methyl
Esplanade SC	Indaziflam
Karmex DF (XP)	Diuron

**Note: Alternative products containing any of the Active Ingredients above or combinations thereof may be substituted for the products mentioned on this list.*

Proposed methods of applying pesticides may include: cut surface, basal bark, or foliar/broadcast applications including: backpack, ATV or truck mounted sprayer.

The proposed IVMP and maps of the encompassing area can be examined at the following libraries:

- Dawson Creek Municipal Library
- Fort St. John Public Library
- Chetwynd Public Library
- Prince George Public Library
- Vanderhoof Public Library
- Fraser Lake Public Library
- Burns Lake Public Library
- Houston Public Library
- Smithers Public Library
