

# Coastal GasLink Pipeline Project

## Project Update – January 10, 2020

Coastal GasLink is being built today and delivering significant benefits to communities across the province. More than 1,000 women and men, many of them local, are currently working on the project from Kitimat to Chetwynd.

With site preparation taking place along the project right-of-way for the past year, project activities are ramping up to prepare for pipe assembly later in 2020 through to 2022.
